

NOVOMATIC also certified in Italy and Spain according to highest player protection standard

Europe's largest gaming technology group now underlines its strong commitment to player protection and the protection of minors with the certification by the Global Gambling Guidance Group (G4) in these two important core markets.

Gumpoldskirchen, November 29th, 2022 – For NOVOMATIC as an international operator of gaming venues as well as a globally exporting technology supplier, Responsible Gaming has always been a top priority. Following the certifications already achieved by the top-selling subsidiaries in Austria, Germany, the UK and the Netherlands, the G4 certification in Italy and Spain now underlines NOVOMATIC's position as a leading supplier of Responsible Gaming in these core markets, as well.

Johannes Gratzl, Member of the Executive Board of NOVOMATIC says: "The successful G4 certification according to the highest international player protection standard now also in Italy and Spain is a remarkable success for us and proves the high importance of player and youth protection at NOVOMATIC". "As an operator of international casinos and a globally exporting technology supplier, compliance with the strictest Responsible Gaming standards and our commitment to social responsibility are an essential part of our corporate strategy. The certifications in Italy and Spain are further milestones on the chosen path, which will be consistently implemented as we move forward," adds Ryszard Presch, his colleague in the Executive Board of NOVOMATIC.

Ynze Remmers, Lead Auditor at G4, highlights: "G4, as a worldwide accreditation program, urges the gambling industry to take responsibility and minimize the impact of problem gambling on communities. NOVOMATIC, successfully passing audits in their five biggest markets and the Netherlands, with the most recent successful audits in Italy and Spain is showing that the chosen route is working. NOVOMATIC demonstrates that Responsible Gambling and harm minimization is a top priority."

NOVOMATIC was the first Austrian gaming company to be certified according to the internationally recognized standard, which is considered the strictest in the field of player protection worldwide. The fact that the majority of the Group's revenues are already certified according to G4 is also unique in the industry. Every three years, the relevant standards are audited in line with the latest scientific findings on the basis of around 100 criteria from all business areas – these include, for example, internal guidelines on prevention training, player and youth protection measures, responsible marketing activities, customer education on the risks of gambling, and self-limitation or blocking options.
